DETAILED ACTION

The amendment filed 10/18/05 has been considered in preparing this Office action.

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “**display controller**” must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-10, 14-18 and 20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Neither the original filed specification nor the drawings describe or show the claimed "a display controller to access data stored in a memory device" as recited in claim 1. The specification and drawing merely suggest a graphics card/chip to access data stored in a memory device. A display controller is not being well known to comprise a graphics card/chip as argued by applicant in the response. Normally, a graphics chip may be able to include a display controller. However, applicant still needs to show the display controller in the drawings and discuss the relationship of graphics card and the display controller in the specification. Claims 4-8, 10, 14-18 and 20 recite similar feature and are rejected under similar rationale.

Allowable Subject Matter

4. Claims 11, 13 and 19 are allowed.

Response to Arguments

5. Applicant's arguments filed 10/18/05 have been fully considered but they are not persuasive.

Applicant's arguments with respect to rejection under 35 USC 102(e) has been withdrawn.

With respect to rejection under 35 USC 112, 1st paragraph, applicant argues that "by the paragraph of the Detailed Description beginning with "The graphics chip 18 reads ..., ". First, the examiner had problem to locate which page or paragraph number or line number applicant is being referred to. Second, even if there is a teaching in the specification, it is a **graphics chip 18** not a **display controller** as claimed. Third, applicant argues that "a display controller being well known to comprises a graphics chip 18". As detailed in 35 USC 112, 1st paragraph, a display controller is not well known to comprises a graphics chip unless applicant submits a prior art to support it.
